CÂMARA MUNICIPAL
VIANA DO CASTELO

IN THE MUNICIPALITY WE IMPLEMENTE A STRAGETY BY:

Monitoring and preserving infrastructures dedicated to the protection of the shore

Studying the sedimentary transportation and the sand replacement.
Dredging rivers and estuaries

Regenerate and preserve the sand dune systems, their fauna and flora

Promote, maintain and create alternatives for the accessibility to beaches (bike paths, boardwalks, buses, etc), limiting parking and using more suitable materials

Enhance the riparian galleries, wet areas and river banks. Clean and unclog water lines (Lima river)

Promote alternative sources of water supply (example: retention of pluvial waters) and recover, enhance and preserve the structures for water retention, particularly the agricultural irrigation systems

Operationalise the Municipal Plan of Defence Against Fires

Promote the planting of indigenous species, better adapted and less combustible, creating a diversity of species and a mosaic of combustibility management

Exploit the Forest Biomass

Promote the management of classified and protected areas

Elaborate the Sustainable Mobility Plan

Implement a bike path network at the urban area and its surroundings

Prepare public and private buildings for the use of renewable energy. Promote the energetic efficiency of the buildings

Improve the energy efficiency used for public lighting
